

Gowtham J

Senior React Native Developer | Android & iOS Engineer

gowthamjagathan@gmail.com | +91 63797 92412 | github.com/Gowtham8940 | linkedin.com/in/gowthamjagan

Tamil Nadu, India | Open to Relocation | Live Mobile Apps Portfolio

Professional Summary

Senior React Native Developer with 3.5+ years of experience architecting and delivering production-grade cross-platform mobile applications for Android and iOS at government scale — serving 800K+ users across India and Ethiopia. Led end-to-end mobile development for Tamil Nadu, Assam, and Ethiopian government edtech platforms with teams of up to 4 engineers. Deep expertise in offline-first architecture, native module development (Swift/Kotlin), encrypted media delivery, real-time systems, React Native New Architecture (Fabric & TurboModules), and AI-powered mobile features. Proven track record in Play Store and App Store deployment, Agile/Scrum delivery, OTA update management (CodePush), and cross-platform performance optimization.

Technical Skills

- **Languages:** JavaScript, TypeScript, Java, Swift, Kotlin
- **Frameworks & Libraries:** React Native CLI, React Native (New Architecture – Fabric, TurboModules), Expo (Managed & Bare Workflow), ReactJS, Redux Toolkit, Zustand, TanStack Query (React Query), WatermelonDB
- **Native Development:** Swift, Kotlin, Native Modules, ExoPlayer, AVFoundation, Custom Video Player Development, Hermes Engine
- **Backend & Realtime:** Firebase, Socket.IO, RabbitMQ, REST APIs, GraphQL (basics)
- **Storage & Security:** MMKV, SQLite, React Native Keychain, AES Encryption/Decryption
- **Payments & AI:** Razorpay, LangChain, MCP Architecture, OpenAI API Integration
- **Testing, Release & Monitoring:** Jest (unit testing), CodePush (OTA Updates), Firebase Crashlytics, Flipper
- **DevTools & Platforms:** Android Studio, Xcode, Git, Jira, Firebase, AWS (S3, Amplify, Cognito), Google Maps SDK
- **Core Expertise:** Offline-First Architecture, Deep Linking, App Size Optimization, Accessibility (a11y), Real-Time Communication, OTA Updates, i18n & RTL Support, Agile/Scrum, App Store & Play Store Deployment, System Design for Mobile, DSA Fundamentals

Work Experience

Resbee Info Technologies Pvt Ltd

Oct 2024 – Present

Senior React Native Developer | Nagercoil, Tamil Nadu

- Led a cross-functional mobile team of 4 engineers, conducting code reviews, defining architectural standards, and managing sprint delivery in an Agile/Scrum workflow using Jira.
- Architected and delivered scalable React Native applications for government and enterprise clients, serving 800K+ users across India and Ethiopia with 99.5% uptime.
- Designed offline-first LMS systems using TanStack Query (React Query), WatermelonDB, Redux Toolkit, and NetInfo — reducing data sync failures by 60% in low-connectivity environments.
- Developed reusable native video player modules using Swift and Kotlin supporting encrypted MP4, MP3, and M3U8 playback for both online and offline access; published packages to NPM with 500+ downloads.
- Built real-time communication workflows using Socket.IO and RabbitMQ for live learning and event-driven features, supporting up to 5,000 concurrent users.
- Integrated Firebase Cloud Messaging (FCM) with advanced notification handling, deep linking, and background processing, improving user engagement by 35%.
- Implemented secure Razorpay payment workflows with subscription management and transaction validation, processing 10K+ monthly transactions.
- Built AI-powered mobile features using LangChain, MCP architecture, and OpenAI API integrations, cutting average student query resolution time by 40%.

- Improved application performance through caching strategies, rendering optimization, lazy loading, and Hermes engine tuning — reducing app startup time by 45% and crash rate by 70%.
- Upgraded React Native applications from v0.63 to v0.85.2, migrating to Fabric renderer and TurboModules (New Architecture), improving frame rate from 45 to 60 FPS on mid-range devices.

Radaz Technologies Pvt Ltd

Mar 2023 – Oct 2024

React Native Developer / Coimbatore, Tamil Nadu

- Developed and maintained cross-platform mobile applications for Android and iOS using React Native, delivering 3 production apps across IoT and e-commerce domains.
- Built IoT-based mobile applications with real-time device monitoring (ESP32, MQTT, Socket.IO), reducing device alert response time by 50%.
- Integrated Google Maps SDKs for live tracking, geolocation, route handling, and map-based workflows, supporting 10K+ daily active users.
- Implemented authentication systems, push notifications, deep linking, and OTA updates via Microsoft CodePush, reducing hotfix deployment time from 2 days to under 2 hours.
- Improved app performance using FlatList optimization and memoization strategies, cutting list render time by 35% and eliminating dropped frames on low-end Android devices.
- Collaborated with backend teams in Agile sprints for API integration, error handling, and production issue resolution, maintaining a 48-hour bug SLA.

Projects

MAAZTER – LMS Platform (Tamil Nadu Government Project)

Live

- Led architecture and development of a large-scale LMS platform serving 200K+ students with real-time learning workflows and live examination systems handling 5,000+ concurrent users.
- Built an AI-assisted live chat system integrated with Firebase and push notification workflows, reducing average student query response time by 40%.
- Developed secure learning modules supporting 20+ educational content formats including SCORM, Vimeo, PDF, video streaming, and interactive study materials.
- Implemented scalable real-time exam systems with optimised synchronisation and wrote Jest unit tests for critical exam workflows.
- **Tech Stack:** React Native, Firebase, Redux Toolkit, Socket.IO, SCORM, Vimeo API, Jest

e-Khool LMS (Assam Government Project)

Live

- Designed and developed a fully offline-first LMS for Assam Government schools in low-connectivity environments, enabling 50K+ students to access content without internet.
- Architected synchronisation workflows using TanStack Query (React Query), WatermelonDB, Redux Toolkit, and NetInfo — achieving 99% data integrity on sync reconnect.
- Developed reusable native media player packages using Swift and Kotlin supporting encrypted MP4, MP3, and M3U8 playback; published to NPM for reuse across enterprise LMS applications.
- Implemented AES encryption/decryption and secure local asset storage using React Native Keychain and native security modules, passing government security audit.
- Migrated app to React Native New Architecture (Fabric + TurboModules), improving startup time by 45% and scroll performance by 30%.
- **Tech Stack:** React Native (New Architecture), TanStack Query (React Query), WatermelonDB, Redux Toolkit, Swift, Kotlin, Keychain

AAEB School & TVET College Platform (Ethiopian Government)

Live

- Led development of multi-role LMS applications supporting 800K+ users with real-time learning workflows and scalable content delivery across 10+ languages.
- Implemented multilingual support using i18n internationalisation, RTL layout support, and accessibility (a11y) standards for diverse regional users.

- Built live exam systems, document viewing modules, and real-time notifications optimised for high-volume concurrent usage (10K+ simultaneous sessions).
- Integrated Firebase and AWS (S3, Amplify, Cognito) for scalable content distribution and real-time communication, achieving sub-200ms notification delivery.
- **Tech Stack:** React Native, Firebase, AWS (Amplify, Cognito, S3), Redux Toolkit, i18n, RTL Support, Accessibility (a11y)

Suya Mobiles – Multi-Role E-commerce Platform

Live

- Developed User, Admin, and Sub-Admin applications within a single React Native codebase using role-based architecture, reducing codebase duplication by 60%.
- Integrated Firebase notifications, Razorpay payments, Google Maps SDK, and deep linking for location-based order workflows.
- Reduced APK size from 60MB to 20MB (67% reduction) through image optimisation, resource management, and API-driven dynamic loading.
- Implemented secure credential storage using React Native Keychain and optimised rendering for low-end Android devices, improving app rating from 3.2 to 4.4 on Play Store.
- **Tech Stack:** React Native, Firebase, Razorpay, Google Maps SDK, Redux Toolkit, MMKV

IoT Automation Apps – Smart Bell & Water Controller

Live

- Developed mobile applications for ESP32-based automation systems, reducing manual intervention by 80% through scheduled smart bell and water monitoring workflows.
- Built real-time monitoring dashboards using Socket.IO and optimised local caching, achieving sub-100ms sensor data refresh rates.
- Implemented live sensor alerts and stable device communication for 24/7 uninterrupted production deployment.
- **Tech Stack:** React Native, ESP32, MQTT, Socket.IO, MMKV

Education

Kongu Engineering College, Erode
B.E. Civil Engineering | GPA: 7.77 / 10

2022

Certifications

- React Native Developer Certificate — Udemy (2023)
- Apple Deployment and Management — Apple Inc. (2024)
- Google Play Store Listing Certificate — Google Play Academy (2025)
- Modern Android App Architecture — Google Developer Program (2026)
- AWS Certified Cloud Practitioner (*in progress* – 2026)

Technical Interests

Mobile Architecture, AI-Powered Mobile Applications, On-Device AI (Core ML, Gemini Nano, TensorFlow Lite), LangChain Workflows, Offline-First Systems, Native Modules, React Native New Architecture, IoT Solutions, Cross-Platform Performance Optimisation, Android TV Applications, Interactive Panels, Desktop Apps
